

Apartment building ‘Faubourien’ renovation Paris (France)

www.fixit.ch

Object description #2497

Location	75000 Paris
Construction	1800
Object type	Apartment building
Design type	Energy-efficient renovation

The Faubourien apartment building at 127–129 Rue de Charenton is a typical 19th-century multi-storey residential building in Paris. The energy-efficient renovation was carried out using Fixit 222 aerogel high-performance insulating plaster. This made it possible to preserve the original, characteristic appearance of the exterior façade, windows and French balconies.
