

Multi-family house «Sternegg Hang» renovation Lucerne

Object description

#2994

Location	6005 Lucerne
Construction	1935
Object type	Apartment building
Design type	Renovation

The block of flats, built in 1935, has undergone a complete refurbishment. In order to improve the building's energy efficiency in future and enhance indoor comfort, it was refurbished using Fixit 222 Aerogel high-performance insulating plaster. The plaster was applied using the spray-plastering method. Our Fixit 745 design plaster was used as the finishing coat. The two-tone façade design is particularly striking with its pastel shades of green.

Products
