

Historic apartment building renovation Lausanne

www.fixit.ch

Object description

#2274

Location	1004 Lausanne
Construction	1905
Object type	Historic building
Design type	Energy-efficient renovation

The historic apartment building in Lausanne, built in 1905, underwent an energy-efficient renovation using Fixit 222 Aerogel high-performance insulating plaster with a layer thickness of 3 cm. This allowed the exterior appearance with the window frames, balconies and cornices to be preserved. Fixit 203 finishing plaster with hydraulic lime in a grain size of 0–1 mm was used as the finishing plaster. This was painted twice with Fixit 786 Si silicate-silicone roll-on paint.

Products

Fixit 203 Finish coat with hydraulic lime
 Fixit 211 Roughcast mortar with adhesive agent
 Fixit 222 Aerogel High Performance Insulating Plaster
 Fixit 223 Special Embedding Mortar
