

Object description

#2379

Location	8003 Zurich
Construction	1935
Object type	Apartment building
Design type	Energy-efficient renovation

The large, multi-storey apartment building from the 1930s was renovated to improve its energy efficiency using Fixit 222 Aerogel high-performance insulating plaster on the exterior – the insulating plaster was sprayed onto the 1200 m² façade surface with a layer thickness of 4 cm and finished with the high-quality mineral finishing plaster Fixit 777.

Products
