## Object description #2387

| | |
|---|---|
| **Location** | 7000 Chur |
| **Object type** | Apartment building |
| **Design type** | Energy-efficient renovation |

The four-unit apartment building was completely renovated, both inside and out. For the energy-efficient façade renovation, Fixit 222 Aerogel high-performance insulating plaster with a layer thickness of 4–5 cm was applied using a spraying method. The character of the façades with their striking stone window frames was visually preserved thanks to the efficient insulating plaster.

## Products

Fixit 222 Aerogel High Performance Insulating Plaster
