

Object description

#2399

Location	8124 Maur
Construction	Early 19th century
Object type	Apartment building
Design type	Energy-efficient renovation

First, the base coat and finish coat were removed from the 19th-century apartment building. The new insulating plaster structure consists of Fixit 211 cement mortar, followed by a layer of Fixit 222 aerogel insulating plaster (layer thickness 30 mm) and a mineral finishing plaster structure with the matching Fixit 784 OF sol-silicate paint.

Products

Fixit 222 Aerogel High Performance Insulating Plaster
 Fixit 211 Roughcast mortar with adhesive agent
 Fixit 493 Mineral-based undercoat stabilizer
 Fixit 223 Special Embedding Mortar
