

Apartment building Ifangstrasse renovation Rümlang

Object description

#2427

Location	8153 Rümlang
Object type	Apartment building
Design type	Energy-efficient renovation

The apartment building in the centre of Rümlang underwent energy-efficient renovation – parts of the façade were insulated with COMPACT PRO rock wool insulation boards from Flumroc and, for reasons of space, the remaining façade areas were insulated with Fixit 222 aerogel high-performance insulation plaster. This meant that the existing window and door frames could be retained.

Products

Fixit 222 Aerogel High Performance Insulating Plaster
 Fixit 211 Roughcast mortar with adhesive agent
