

Multi-family house renovation Dübendorf

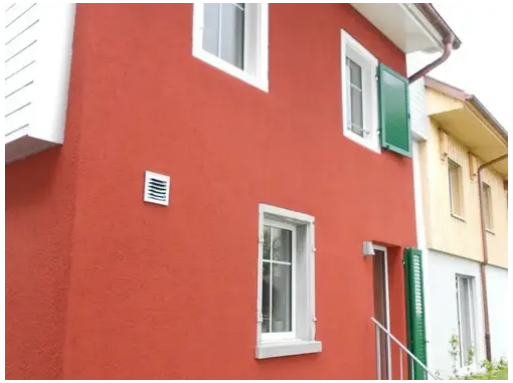

www.fixit.ch

Object description #2439

Location	8600 Dübendorf
Construction	16th/17th century
Object type	Apartment building
Design type	Energy-efficient renovation

The 16th/17th century building complex was renovated. The existing base coat and finishing coat were removed. The exterior façade was rebuilt using Fixit 211 cement mortar and Fixit 222 aerogel high-performance insulating plaster. This was followed by a mesh embedding with Fixit 223 special embedding mortar and a mineral finishing plaster structure with Fixit 493 substrate stabiliser and Fixit 763 finishing plaster with a grain size of 3–4 mm.

Products

Fixit 211 Roughcast mortar with adhesive agent
Fixit 493 Mineral-based undercoat stabilizer
Fixit 222 Aerogel High Performance Insulating Plaster
Fixit 223 Special Embedding Mortar
