

Historic building 'Barandun' Renovation Zillis

Object description

#2443

Location	7432 Zillis
Construction	1860
Object type	Historic building Detached house
Design type	Energy-efficient renovation

The historic 'Barandun' building underwent an energy-efficient façade renovation. To this end, the existing base plaster was removed, the underlying masonry was dry cleaned and the entire façade was prepared with brick lath. Fixit 222 Aerogel high-performance insulating plaster with a layer thickness of 3–5 cm was applied directly to the brick lath. This was followed by Fixit 733/734 Stucco finishing plaster, which was painted twice with mineral Fixit 784 OF sol-silicate paint.

Products

Fixit 493 Mineral-based undercoat stabilizer
 Fixit 222 Aerogel High Performance Insulating Plaster
