

Object description

#2455

Location	8803 Rüschlikon
Object type	Apartment building
Design type	Energy-efficient renovation

The multi-family house is located on the mountain side of Rüschlikon railway station. The building was threatened with demolition, but when the Rüschlikon Housing Foundation acquired the property, plans were made and implemented to renovate and modernise the building to make it more energy efficient. The external insulation was carried out using our efficient, high-performance insulation plaster Fixit 222 Aerogel, which allowed the original appearance of the building to be preserved.

Products

Fixit 222 Aerogel High Performance Insulating Plaster
 Fixit 211 Roughcast mortar with adhesive agent
 Fixit 493 Mineral-based undercoat stabilizer
 Fixit 777 Final render extra white
