# ARMONIE LUMINOSE E RILASSANTI

**Tonalità pastello per il design**

---

PASTELLO sono quelle tonalità tenui, un po' incerte, tendenti al bianco, protagoniste dei dipinti delicati e luminosi realizzati appunto con i colori pastello.

**In natura ricordano i colori chiari del risveglio primaverile dal torpore invernale.**

I colori pastello hanno trovato ampio spazio nel design d'interni: queste tonalità morbide sono utilizzate per creare ambienti rilassanti e invitanti, ideali per la zona notte, e anche per i soggiorni e le aree destinate al relax. Le pareti dipinte con tonalità pastello possono aprire lo spazio, rendendolo più luminoso e arioso. Inoltre, gli accessori e gli elementi d'arredo in colori pastello contribuiscono a ingentilire l'ambiente.

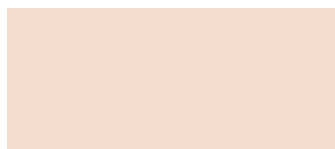

---

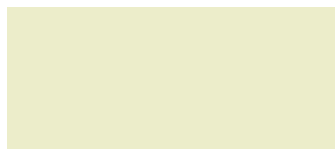

» Il colore influenza il nostro sentire, ogni tonalità parla al nostro animo. «
