

**SECTION 1: Identification of the substance/mixture and of the company/undertaking****Product identifier****Trade name:****AQUA DUO 822 - Powder component**

Two-component polymer-cement waterproofing mortar

**Unique Formula Identifier (UFI-Code):**

K8Y3-51MP-6009-SRYE

**Relevant identified uses of the substance or mixture and uses advised against****Life cycle stages**

C/PW Consumer use / Widespread use by professional workers

**Sector of Use**

SU19 Building and construction work

**Product category**

PC1 Adhesives, sealants

**Process category**

PROC10 Roller application or brushing

PROC19 Manual activities involving hand contact

**Environmental release category**

ERC10a / ERC11a Widespread use of articles with low release

**Article category**

AC0 Other

**Application of the substance / the preparation**

Ready-mixed mortar - Product for an industrial, technical and private use for mixing with water and subsequent processing on buildings. For all other uses is advised against/ not recommended.

**Details of the supplier of the safety data sheet****Manufacturer/Supplier:**KREISEL - Technika Budowlana Sp. z o.o.  
ul. Szarych Szeregów 23

(Contd. of page 1)

## SECTION 2: Hazards identification

### Classification of the substance or mixture

Skin Irrit. 2 H315 Causes skin irritation.  
 Eye Dam. 1 H318 Causes serious eye damage.  
 Skin Sens. 1 H317 May cause an allergic skin reaction.  
 STOT SE 3 H335 May cause respiratory irritation.

### Additional information:

The classification in terms of skin and eye irritation is based on the results of animal studies, see section 16 literature [4], [11] and [12].

### Label elements

#### GHS label elements

The product is classified and labelled according to the Globally Harmonised System (GHS).

#### Hazard pictograms

GHS05 GHS07

#### Signal word

Danger

#### Hazard-determining components of labelling:

Portland cement clinker

#### Hazard statements

H315 Causes skin irritation.  
 H318 Causes serious eye damage.  
 H317 May cause an allergic skin reaction.  
 H335 May cause respiratory irritation.

#### Precautionary statements

P102 Keep out of reach of children.  
 P261 Avoid breathing dust.  
 P271 Use only outdoors or in a well-ventilated area.  
 P280 Wear protective gloves/protective clothing/eye protection/face protection.  
 P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
 P315 Get immediate medical advice/attention.  
 P302+P352 IF ON SKIN: Wash with plenty of soap and water.  
 P332+P313 If skin irritation occurs: Get medical advice/attention.  
 P362+P364 Take off contaminated clothing and wash it before reuse.  
 P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.  
 P501 Dispose of contents/container in keeping with local and national regulations.

#### Other hazards

As soon as the dry mixture comes into contact with water or humidity, a strongly alkaline solution will be formed. Wet mortar may cause skin and eye irritation due to the high alkalinity. Especially with prolonged contact (e.g. knees in wet mortar) the risk of serious skin damage increases due to the alkalinity.

The part of respirable, cristaline siliciumdioxide amounts below 1%. The product ist no subject to a declaration obligation. However, the use of breathing protection is advisable.

(Contd. on page 3)

### AQUA DUO 822 - Powder component

(Contd. of page 2)

Dust from the dry mixture can cause respiratory irritation. Frequent inhalation of large amounts of dust increases the risk of developing lung diseases.

The mixture is chromate reduced and therefore is no risk of sensitization by chromate. The ready to use form after addition of water contains in maximum 0,0002% of soluble chromium(VI) based on the dry weight of the cement. Proper dry storage and compliance with the maximum storage time is required for an effective chromate reduction.

#### Results of PBT and vPvB assessment

##### PBT:

This substance/mixture contains no components classified as persistent, bioaccumulative and toxic (PBT) at levels of 0.1% or higher.

##### vPvB:

This substance/mixture contains no components classified as very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

## SECTION 3: Composition/information on ingredients

#### Chemical characterization: Substances

This product is a mixture.

#### Mixtures

#### Description:

Mixture of inorganic binders, fillers and nonhazardous additions

#### Dangerous components:

CAS: 14808-60-7 EINECS: 238-878-4 REACH: <sup>1</sup>	Silicon dioxide (< 1% RCS) Consisting of: 14808-60-7 Quartz (SiO <sub>2</sub> ); 14464-46-1 Cristobalite; 15468-32-3 Tridymite	50 - < 100%
CAS: 65997-15-1 EINECS: 266-043-4 REACH: <sup>1</sup>	Portland cement clinker Consisting of: 12168-85-3 Tricalcium silicate (45 - 70%); 10034-77-2 Dicalcium silicate (5 - 25%); 12042-78-3 Tricalcium aluminate (0 - 10%); 12612-16-7 Calcium aluminate ferrite (0 - 10%)  Specific concentration limits: Skin Irrit. 2; H315: C ≥ 1 % Eye Dam. 1; H318: C ≥ 1 %	25 - 50%

#### Additional information:

For the wording of the listed hazard phrases refer to section 16.

<sup>1</sup> Not subject to registration in accordance with EC 1907/2006 Annex V (point 7) or Article 2.

## SECTION 4: First aid measures

#### Description of first aid measures

First aid

#### General information:

For first responder no special personal protective equipment is required. First responder should avoid contact with the product.

(Contd. on page 4)

**AQUA DUO 822 - Powder component**

(Contd. of page 3)

**After inhalation:**

Remove dust source and provide fresh air or bring the person in fresh air. If discomfort, cough or persistent irritation, seek medical attention.

**After skin contact:**

Immediately wash with water and soap and rinse thoroughly. Immediately remove all soiled and contaminated clothing. Wash contaminated clothes before reuse. Clean contaminated shoes before reuse. If skin irritation continues, consult a doctor.

**After eye contact:**

Do not rub eyes because additional damage to eyes can be caused by mechanical stress. If necessary, remove contact lenses and flush the eye immediately while holding eyelids open to water for at least 20 minutes. If possible, isotonic eyewash solution (e. g. 0,9% NaCl). Always consult an occupational physician or ophthalmologist.

**After swallowing:**

Do not induce vomiting. If conscious rinse mouth with water and drink plenty of water. Consult a physician or poison control center.

**Most important symptoms and effects, both acute and delayed**

Symptoms and effects are described in section 2 and 11.

Eye contact with the product may cause serious and potentially permanent damage.

The product in the dry state by prolonged contact can also have an irritant effect on moist skin. The contact with moist skin may cause skin irritation, dermatitis or other serious skin damage.

**Indication of any immediate medical attention and special treatment needed**

If a physician is to be consulted, as per possibility he should be presented this safety data sheet.

## SECTION 5: Firefighting measures

**Extinguishing media****Suitable extinguishing agents:**

The mixture is flammable neither in the delivery condition nor in mixed conditions. Extinguisher and fire fighting are therefore adjusted to the surrounding fire.

**Special hazards arising from the substance or mixture**

This product is neither explosive nor flammable, and non-oxidizing with other materials. Inorganic dust can appear in case of fire. Avoid formation of dust. Reacts alkaline with water.

**Advice for firefighters**

No special measures required. Collect contaminated fire fighting water separately. It must not enter the sewage system. Dispose of fire debris and contaminated fire fighting water in accordance with official regulations.

## SECTION 6: Accidental release measures

**Personal precautions, protective equipment and emergency procedures**

Avoid formation of dust. Avoid inhalation, eye and skin contact. If appropriate, reference must be made to exposure controls and personal protection (see section 8).

**Environmental precautions**

Do not allow product to reach water because an increase of pH may be caused. Ecotoxicological effects may occur when the pH-value is above 9. National regulations for waste water and groundwater are to be observed.

**Methods and material for containment and cleaning up**

Collect spilled dry material dry and use if possible. Avoid formation of dust. For cleaning use at least industrial vacuum dust class M (DIN EN 60335-2-69). Do not dry sweep. Never use compressed air for cleaning. If, during a dry cleaning dust is formed, then it is necessary to use personal protective equipment. Avoid inhalation of emerging dust and contact with skin. Dispose of the material collected according to regulations.

(Contd. on page 5)

**AQUA DUO 822 - Powder component**

(Contd. of page 4)

Let the mixed mortar solidify and dispose of (see section 13.1).

**Reference to other sections**

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

## SECTION 7: Handling and storage

**Precautions for safe handling:**

Ensure good ventilation/exhaustion at the workplace. Prevent formation of dust. Avoid contact with the eyes and skin. Wear protective clothing. Washing facilities / Water for cleaning eyes and skin should be available. Persons, who tend to skin diseases or other hypersensitivity reactions of the skin, should not handle the product. Do not eat, drink, smoke or sniff while working.

Do not use products after the specified storage period any more, because the effect of the reducing agent contained decreases and the content of soluble chromium (VI) may exceed those limits mentioned in section 2.3. In these cases may develop an allergic Chromate dermatitis with prolonged contact due to the water-soluble chromate contained in the product.

**Information about fire - and explosion protection:**

No special measures required.

**Conditions for safe storage, including any incompatibilities**

**Storage:**

**Requirements to be met by storerooms and receptacles:**

Keep out of reach of children. Store in cool, dry place in tightly closed receptacles. Do not use light alloy receptacles.

**Information about storage in one common storage facility:**

Keep away from foodstuffs, beverages and feed.

**Further information about storage conditions:**

Store dry. Prevent ingress of water and moisture. Always keep in original container. Improper storage (ingress of moisture) or exceeding the maximum storage period, can subside the effect of contained chromate reducer (see section 7.1).

**Minimum storage life:**

Minimum storage life (store dry, up to 20°C): See indication on package.

**Storage class: 13**

**Specific end use(s)**

No further relevant information available.

## SECTION 8: Exposure controls/personal protection

**Control parameters**

**Ingredients with limit values that require monitoring at the workplace:**

**14808-60-7 Silicon dioxide (< 1% RCS)**

BOELV (EU)	Long-term value: 0.1* mg/m <sup>3</sup> *respirable fraction
------------	---

**65997-15-1 Portland cement clinker**

WEL (Great Britain)	Long-term value: 10* 4** mg/m <sup>3</sup> *inhalable dust **respirable dust
---------------------	---

**Ingredients with biological limit values:**

Void

(Contd. on page 6)

**AQUA DUO 822 - Powder component**

(Contd. of page 5)

**Additional Occupational Exposure Limit Values for possible hazards during processing:**

**Components with general dust limit**

MAK (Great Britain)	Long-term value: 4 a 10 e mg/m <sup>3</sup>
---------------------	---

a - alveoles passing particles    e - respirable particles    (DIN EN 481)

**Additional information:**

The lists valid during the making were used as basis.

**Information about design of technical facilities**

For reduction of the dust formation, closed systems (e. g. silo with conveyor) local exhaust or other engineering controls such as plastering machines or continuous mixers with special additional equipment for dust detection should be used.

**Individual protection measures, such as personal protective equipment**

**General protective and hygienic measures:**

Keep away from foodstuffs, beverages and feed. Remove contaminated clothing immediately and thoroughly clean it before using it again. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin. Do not eat, drink, smoke or sniff while working. Use skin protection cream for skin protection. Ensure that washing facilities are available at the work place.

**Respiratory protection:**

Particle filtering half mask (FFP2 according to EN 149)

Compliance with the Occupational Exposure Limits is to be ensured through effective dust-technical measures, such as local exhaust ventilation. If there is a risk of exceeding the exposure limits, e. g. the open fiddling with the powdered dry product or during processing by splash, an appropriate respirator must be used.

**Hand protection:**

Hand protection: Chemical resistant protective gloves according EN ISO 374

Wear waterproof, abrasion and alkali-resistant protective gloves with CE marking. leather gloves are not suitable on the basis of their water permeability and can release chromate-containing compounds.

**Material of gloves:**

When preparing and processing the ready-mix, no chemical-resistant gloves (Cat. III) are necessary. Studies have shown that nitrilge-soaked cotton gloves (layer thickness about 0.15 mm) offer over a period of 480 min adequate protection. Change damp gloves. Keep gloves ready for change.

**Penetration time of glove material:**

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

**For the permanent contact gloves made of the following materials are suitable:**

Polychloroprene (material thickness  $\geq 0.5$  mm ; breakthrough time  $\geq 480$  min.)  
Nitrile rubber (material thickness  $\geq 0.35$  mm ; breakthrough time  $\geq 480$  min.)  
Butyl rubber (material thickness  $\geq 0.5$  mm ; breakthrough time  $\geq 480$  min.)  
Fluororubber (material thickness  $\geq 0.4$  mm ; breakthrough time  $\geq 480$  min.)  
Neoprene (material thickness  $\geq 0.5$  mm ; breakthrough time  $\geq 480$  min.)

(Contd. on page 7)

**AQUA DUO 822 - Powder component**

(Contd. of page 6)

**Not suitable are gloves made of the following materials:**

Non-liquid-tight gloves made of fabric, leather or similar materials.

**Eye/face protection:**

In case of dust development or splash risk use tightly fitting safety goggles according to EN 166.

**Body protection:**

Wear closed long-sleeved clothing and tight shoes. If contact with fresh mortar is unavoidable, the protective clothing should also be waterproof. Make sure that no fresh mortar from above gets into the shoes or boots.

**Risk management measures:**

An operator training/guidance in the correct use of personal protective equipment is necessary to ensure the required level of effectiveness.

**Environmental exposure controls**

Do not allow product to reach water because an increase of pH may be caused. Ecotoxicological effects may occur when the pH-value is above 9. National regulations for waste water and groundwater are to be observed.

## SECTION 9: Physical and chemical properties

**Information on basic physical and chemical properties****General Information****Physical state**

Solid

**Appearance:****Form:**

Powder

**Colour:**

Grey

**Odour:**

Odourless

**Odour threshold:**

Not safety relevant

**pH at 20 °C (68 °F)**

&gt; 11

**Change in condition****Melting point/freezing point:**

&gt; 1,300 °C (&gt; 34.300 °F) (ISO 3016)

**Boiling point or initial boiling point and****boiling range**

Not applicable

**Flammability**

Product is not flammable.

**Flash point:**

Not applicable

**Auto-ignition temperature:**

Not applicable

**Decomposition temperature:**

Not determined

**Oxidising properties:**

None

**Explosive properties:**

Product does not present an explosion hazard.

**Ignition temperature:**

Product is not selfigniting.

**Density and/or relative density****Density:**

Not determined

**Bulk density:**1,349 - 1,651 kg/m<sup>3</sup>**Particle size****Solubility****Water:**

Not miscible or difficult to mix

**Partition coefficient n-octanol/water (log value)**

Not determined

**Solids content:**

<b>Desensitised explosives</b>	Void

**SECTION 10: Stability and reactivity**

**Reactivity**

Reacts alkaline with water. A proposed reaction takes place in contact with water, during which the product hardens and forms a solid mass, which does not react with the environment.

**Chemical stability:**

The product is stable as long as it is stored properly and dry.

**Thermal decomposition / conditions to be avoided:**

No decomposition if used according to specifications.

**Possibility of hazardous reactions**

No dangerous reactions known (see 10.5).

**Conditions to avoid**

Prevent entry of water and moisture during storage (the mixture reacts with moisture alkaline and hardens).

**Incompatible materials**

Reacts exothermically with acids. The wet product is alkaline and reacts with acids, ammonium salts and base metals e.g. aluminum, zinc or brass. The reaction with base metals produces hydrogen.

**Hazardous decomposition products**

No decomposition if used and stored according to specifications.

**Minimum storage life:**

Minimum storage life (store dry, up to 20°C): See indication on package.

**Additional information:**

The mixture is chromate reduced. The ready for use preparation after addition of water contains in maximum 2 mg/kg dissolvable chrom(VI) related to the dry mass. Prerequisite for the chromate reduction is the appropriate storage under consideration of the maximum storage life.

GB

(Contd. on page 9)

**AQUA DUO 822 - Powder component**

(Contd. of page 8)

### SECTION 11: Toxicological information

**Information on hazard classes as defined in Regulation (EC) No 1272/2008**

The product was not investigated. The statement is derived from the properties of the single components.

**Acute toxicity:**

Based on available data, the classification criteria are not met.

**LD/LC50 values relevant for classification:**

**14808-60-7 Silicon dioxide (< 1% RCS)**

Oral	LD <sub>50</sub>	> 5,000 mg/kg (Rat)
Dermal	LD <sub>50</sub>	> 5,000 mg/kg (Rat)

**65997-15-1 Portland cement clinker**

Oral	LD <sub>50</sub>	> 2,000 mg/kg (Mouse) In animal studies with cement dust no acute toxicity was observed. On the basis of the available data, the classification criteria are not fulfilled.
Dermal	LD <sub>0</sub> (no lethality)	> 2,000 mg/kg (Rabbit) (Limit test 24h [4]) On the basis of the available data, the classification criteria are not fulfilled.
Inhalative	LD <sub>0</sub> (no lethality)	5 mg/m <sup>3</sup> (Rat) (Limit test [10]) On the basis of the available data, the classification criteria are not fulfilled.

**Other information (about experimental toxicology):**

**14808-60-7 Silicon dioxide (< 1% RCS)**

Irritation of skin	OECD 404 (skin)	(Rabbit) not irritant
Irritation of eyes	OECD 405 (eye)	(Rabbit) not irritant
Sensitisation	OECD 429 (LLNA)	(Mouse) not sensitizing

**Primary irritant effect:**

**On the skin:**

Cement has a skin and mucous irritant effect. Dry cement in contact with moist skin or skin in contact with moist or wet cement may lead to different irritant and inflammatory skin reactions, e. g. As redness and cracking. Prolonged contact in combination with abrasion can cause serious skin damage, see section 16 literature [4].  
Causes skin irritation.

**On the eye:**

In the in vitro test showed Portland cement clinker varying degrees of impact on the cornea. The calculated "irritation index" is 128. Direct contact with cement may lead by mechanical reaction, irritation and inflammation to corneal damage. Direct contact with larger amounts of dry or wet cement may cause effects ranging from moderate eye irritation to serious eye damage and blindness, see Section 16 References [11] and [12].  
Causes serious eye damage.

**Sensitization:**

May cause an allergic skin reaction.

**Specific target organ toxicity - single exposure (STOT SE):**

Cement dust exposure may cause irritation of the respiratory system. Coughing, sneezing, and shortness of breath may be the result if exposure above the occupational exposure limit, see Section 16 References [1].

(Contd. on page 10)

**AQUA DUO 822 - Powder component**

(Contd. of page 9)

May cause respiratory irritation.

**Specific target organ toxicity - repeated exposure (STOT RE):**

Long term exposure to respirable dust in excess of occupational exposure limit may result in coughing, shortness of breath and chronic obstructive changes in the respiratory tract. At low concentrations, no chronic effects were observed, see section 16 literature [17]. Based on the available data, the classification criteria are not fulfilled.

Cement may aggravate existing skin disorders, eye and respiratory tract, e. g. with emphysema or asthma.

Frequent inhalation of large amounts of dust increases the risk of developing lung diseases.

**Practical experience**

No further relevant information available.

**General comments**

See section 16 (literature and references).

**Subacute to chronic toxicity:**

The contact with wet cement may cause skin eczema on some individuals. This can be triggered either by the pH (irritant contact dermatitis) or by immunological reaction of water soluble chromium(VI) (allergic contact dermatitis), see section 16 literature [5] and [13].

**Information on other hazards**

**Endocrine disrupting properties**

None of the ingredients is listed.

**SECTION 12: Ecological information**

**Toxicity**

The product was not investigated. The statement is derived from the properties of the single components.

**Aquatic toxicity:**

**65997-15-1 Portland cement clinker**

LC <sub>50</sub>	mg/l (Water flea - daphnia magna) (low effect [6,8])
	mg/l (Algae - selenastrum coli) (low effect [7,8])
	mg/l (Sediments) (low effect [9])

**Persistence and degradability**

Anorganic product, is not removable from water by biological cleaning process

**Bioaccumulative potential**

Does not accumulate in organisms

**Mobility in soil**

Slightly soluble

**Results of PBT and vPvB assessment**

**PBT:**

This substance/mixture contains no components classified as persistent, bioaccumulative and toxic (PBT) at levels of 0.1% or higher.

**vPvB:**

This substance/mixture contains no components classified as very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

**Endocrine disrupting properties**

This substance/mixture does not contain components with endocrine disrupting properties according to the criteria of Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 in concentrations of 0.1% or higher.

(Contd. on page 11)

### AQUA DUO 822 - Powder component

(Contd. of page 10)

**Other adverse effects**

No further relevant information available.

**Literature**

See section 16 (literature and references).

**Ecotoxicological effects:**

Only by increasing the pH value during application of large quantities.

**Behaviour in sewage processing plants:**

No further relevant information available.

**Remark:**

Ecotoxicological tests with Portland cement on *Daphnia magna* (US EPA, 1994a, see Section 16 References [6]) and *Selenastrum Coli* (US EPA, 1993, see section 16 literature [7]) have shown little toxicological effect. Therefore, the LC50 and EC50 values could not be determined, see section 16 literature [8]. There were also no toxic effects on sediments are found, see section 16 literature [9]. The addition of large quantities of cement in water can cause a pH increase and thus be toxic to aquatic life under special circumstances.

**Additional ecological information:****General notes:**

Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

## SECTION 13: Disposal considerations

**Waste treatment methods****Recommendation:**

Must not be disposed together with household garbage. Do not allow product to reach sewage system.

Gather dry, store in labeled containers and re-use if possible, taking into account the maximum storage time or mix residual amounts while avoiding any skin contact and exposure to dust with water. Moisture products or product slurry to harden and dispose of according to local regulatory regulations.

Risk of environmental pollution. Follow the applicable regulations on waste disposal. Keep unused products and contaminated packaging sealed. Provide containers for waste collection. Hand over for disposal to a specialist company authorised to carry out such activities. Prevent the product from being released into the environment. Do not allow the product to enter the sewage system. Must not be disposed of with municipal waste. Empty containers can be utilised for energy recovery in a waste incineration plant or, if classified accordingly, collected at a landfill site. Perfectly cleaned packaging can be recycled.

Dispose of contents/container in accordance with local/regional/national/international regulations.

**European waste catalogue**

16 03 03*	Inorganic wastes containing hazardous substances
17 09 04	Mixed construction and demolition wastes other than those mentioned in 17 09 01, 17 09 02 and 17 09 03
HP4	Irritant - skin irritation and eye damage
HP5	Specific Target Organ Toxicity (STOT)/Aspiration Toxicity
HP13	Sensitising

**Chemical safety assessment**

A Chemical Safety Assessment has not been carried out.

**SECTION 16: Other information**

**Reasons for changes:**

\* Data compared to the previous version altered.

**Relevant phrases:**

H315 Causes skin irritation.

H317 May cause an allergic skin reaction.

H318 Causes serious eye damage.

H335 May cause respiratory irritation.

**Advice for instructions:**

Additional trainings, which go beyond the prescribed training in activities involving hazardous substances are not required.

LC50: Lethal concentration, 50 percent

LD50: Lethal dose, 50 percent

PBT: Persistent, Bioaccumulative and Toxic

vPvB: very Persistent and very Bioaccumulative

ATE: Acute toxicity estimate values

Skin Irrit. 2: Skin corrosion/irritation – Category 2

Eye Dam. 1: Serious eye damage/eye irritation – Category 1

Skin Sens. 1: Skin sensitisation – Category 1

Skin Sens. 1B: Skin sensitisation – Category 1B

STOT SE 3: Specific target organ toxicity (single exposure) – Category 3

**Further information:**

The information in this safety data sheet describe the safety requirements of our product and is based on our current state of our knowledge. They provide no assurance of product quality. Existing laws, ordinances and regulations, including those that are not mentioned in this data sheet must be observed by the recipient of our products in their own responsibility.

**SECTION 1: Identification of the substance/mixture and of the company/undertaking****Product identifier****Trade name:****AQUA DUO 822 - Liquid component**

Two-component polymer-cement waterproofing mortar

**Relevant identified uses of the substance or mixture and uses advised against****Life cycle stages**

C/PW Consumer use / Widespread use by professional workers

**Sector of Use**

SU19 Building and construction work

**Product category**

PC1 Adhesives, sealants

**Process category**

PROC10 Roller application or brushing

PROC19 Manual activities involving hand contact

**Environmental release category**

ERC10a / ERC11a Widespread use of articles with low release

**Article category**

AC0 Other

**Application of the substance / the preparation**

Construction chemicals - Product for industrial and technical use for mixing with preparations of construction products. For all other uses is advised against/not recommended.

**Details of the supplier of the safety data sheet****Manufacturer/Supplier:**KREISEL - Technika Budowlana Sp. z o.o.  
ul. Szarych Szeregów 23  
60-462 Poznań  
Poland

(Contd. of page 1)

## SECTION 2: Hazards identification

### Classification of the substance or mixture

The product is not classified, according to the Globally Harmonised System (GHS).

### Label elements

GHS label elements Void

### Hazard pictograms

Void

### Signal word

Void

### Hazard statements

Void

### Precautionary statements

Observe the general safety regulations when handling chemicals.

### Additional information:

EUH208 Contains 2-Methyl-2H-isothiazol-3-one. May produce an allergic reaction.

### Other hazards

No further relevant information available.

### Results of PBT and vPvB assessment

#### PBT:

This substance/mixture contains no components classified as persistent, bioaccumulative and toxic (PBT) at levels of 0.1% or higher.

#### vPvB:

This substance/mixture contains no components classified as very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

## SECTION 3: Composition/information on ingredients

### Chemical characterization: Substances

This product is a mixture.

### Mixtures

#### Description:

Mixture of binder dispersion, fillers and nonhazardous additions

#### Dangerous components:

CAS: 2682-20-4 EINECS: 220-239-6 REACH: 01-2120764690-50	2-Methyl-2H-isothiazol-3-one ⚠ Acute Tox. 3, H301; Acute Tox. 3, H311; Acute Tox. 2, H330; ⚠ Skin Corr. 1B, H314; ⚠ Aquatic Acute 1, H400; ⚠ Skin Sens. 1A, H317 Specific concentration limit: Skin Sens. 1; H317: C ≥ 0.0015 %	< 0.0015%
--	---	-----------

#### Other components (>20%):

CAS: 7732-18-5 EINECS: 231-791-2 REACH: <sup>1</sup>	Water	50 - < 100%
Polymer REACH: <sup>1</sup>	Polymer based on acrylic ester and acrylonitrile	25 - 50%

(Contd. on page 3)

**AQUA DUO 822 - Liquid component**

(Contd. of page 2)

**Additional information:**

For the wording of the listed hazard phrases refer to section 16.

<sup>1</sup> Not subject to registration in accordance with EC 1907/2006 Annex V (point 7) or Article 2.**SECTION 4: First aid measures****Description of first aid measures**

First aid

**General information:**

For first responder no special personal protective equipment is required. First responder should avoid contact with the product.

**After inhalation:**

Take affected persons into fresh air and keep quiet. Seek medical treatment in case of complaints. In case of irregular breathing or respiratory arrest provide artificial respiration. In case of unconsciousness place patient stably in side position for transportation.

**After skin contact:**

Immediately wash with water and soap and rinse thoroughly. Immediately remove all soiled and contaminated clothing. Wash contaminated clothes before reuse. Clean contaminated shoes before reuse. If skin irritation continues, consult a doctor.

**After eye contact:**

Do not rub eyes because additional damage to eyes can be caused by mechanical stress. If necessary, remove contact lenses and flush the eye immediately while holding eyelids open to water for at least 20 minutes. If possible, isotonic eyewash solution (e. g. 0,9% NaCl). Always consult an occupational physician or ophthalmologist.

**After swallowing:**

Do not induce vomiting. If conscious rinse mouth with water and drink plenty of water. Consult a physician or poison control center.

**Most important symptoms and effects, both acute and delayed**

Symptoms and effects are described in section 2 and 11.

**Hazards:**

No further relevant information available.

**Indication of any immediate medical attention and special treatment needed**

If a physician is to be consulted, as per possibility he should be presented this safety data sheet.

**SECTION 5: Firefighting measures****Extinguishing media**

The mixture is flammable neither in the delivery condition not in mixed conditions. Extinguisher and fire fighting are therefore adjusted to the surrounding fire.

**Suitable extinguishing agents:**

The mixture is flammable neither in the delivery condition not in mixed conditions. Extinguisher and fire fighting are therefore adjusted to the surrounding fire.

**Special hazards arising from the substance or mixture**

This product is neither explosive nor flammable, and non-oxidizing with other materials. Particular danger of slipping on leaked/spilled product.

(Contd. on page 4)

**AQUA DUO 822 - Liquid component**

(Contd. of page 3)

**Advice for firefighters**

No special measures required. Collect contaminated fire fighting water separately. It must not enter the sewage system. Dispose of fire debris and contaminated fire fighting water in accordance with official regulations.

### SECTION 6: Accidental release measures

**Personal precautions, protective equipment and emergency procedures**

If appropriate, reference must be made to exposure controls and personal protection (see section 8).

**Environmental precautions**

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

**Methods and material for containment and cleaning up**

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose of the material collected according to regulations.

**Reference to other sections**

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

### SECTION 7: Handling and storage

**Precautions for safe handling:**

Ensure good ventilation/exhaustion at the workplace. Avoid contact with the eyes and skin. Wear protective clothing. Washing facilities / Water for cleaning yes and skin should be available. Persons, who tend to skin diseases or other hypersensitivity reactions of the skin, should not handle the product. Do not eat, drink, smoke or sniff while working.

**Information about fire - and explosion protection:**

No special measures required.

**Conditions for safe storage, including any incompatibilities****Storage:****Requirements to be met by storerooms and receptacles:**

Keep out of reach of children. Store in cool, dry place in tightly closed receptacles.

**Information about storage in one common storage facility:**

Keep away from foodstuffs, beverages and feed.

**Further information about storage conditions:**

Protect from frost. Protect from heat and direct sunlight.

**Minimum storage life:**

Minimum storage life (+5°C up to 25°C): See indication on package.

**Storage class: 12****Specific end use(s)**

No further relevant information available.

GB

(Contd. on page 5)

**AQUA DUO 822 - Liquid component**

(Contd. of page 4)

**SECTION 8: Exposure controls/personal protection**

**Control parameters**

**Ingredients with limit values that require monitoring at the workplace:**

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

**DNELs**

**2682-20-4 2-Methyl-2H-isothiazol-3-one**

Oral	Long term exposure	0.027 mg/kg bw/d (Consumer)
	Short term exposure	0.053 mg/kg bw/d (Consumer)
Inhalative	Local - Long term exposure	0.021 mg/m <sup>3</sup> (Consumer)
		0.021 mg/m <sup>3</sup> (Employee)
	Local - Short term exposure	0.34 mg/m <sup>3</sup> (Consumer)
		0.34 mg/m <sup>3</sup> (Employee)

**PNECs**

**2682-20-4 2-Methyl-2H-isothiazol-3-one**

Freshwater	0.00339 mg/l (not specified)
Soil	0.047 mg/kg (not specified)
Sediments (Marine water)	0.00339 mg/kg (not specified)
Sewage plant	0.23 mg/l (not specified)

**Ingredients with biological limit values:**

Void

**Additional information:**

The lists valid during the making were used as basis.

**Information about design of technical facilities**

No further data; see item 7.

**Individual protection measures, such as personal protective equipment**

**General protective and hygienic measures:**

Use skin protection cream for skin protection. Avoid close or long term contact with the skin. Avoid contact with the eyes. Wash hands before breaks and at the end of work. Keep away from foodstuffs, beverages and feed. Do not eat, drink, smoke or sniff while working.

**Respiratory protection:**

Use suitable respiratory protective device only when aerosol or mist is formed (FFP2 according to EN 149)

**Hand protection:**

Hand protection: Chemical resistant protective gloves according EN ISO 374

The glove material has to be impermeable and resistant to the product. Due to missing tests no recommendation to the glove material can be given for the product. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation. Check protective gloves prior to each use for their proper condition. Preventive skin protection by use of skin-protecting agents is recommended. To avoid skin problems reduce the wearing of gloves to the required minimum.

(Contd. on page 6)

### AQUA DUO 822 - Liquid component

(Contd. of page 5)

**Material of gloves:**

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

**Penetration time of glove material:**

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

**For the permanent contact gloves made of the following materials are suitable:**

Polychloroprene (material thickness  $\geq 0.5$  mm ; breakthrough time  $\geq 480$  min.)

Nitrile rubber (material thickness  $\geq 0.35$  mm ; breakthrough time  $\geq 480$  min.)

Butyl rubber (material thickness  $\geq 0.5$  mm ; breakthrough time  $\geq 480$  min.)

Fluororubber (material thickness  $\geq 0.4$  mm ; breakthrough time  $\geq 480$  min.)

Neoprene (material thickness  $\geq 0.5$  mm ; breakthrough time  $\geq 480$  min.)

**Not suitable are gloves made of the following materials:**

Non-liquid-tight gloves made of fabric, leather or similar materials.

**Eye/face protection:**

In case of splash risk use tightly fitting safety goggles according to EN 166.

**Body protection:**

Protective work clothing

**Risk management measures:**

An operator training/guidance in the correct use of personal protective equipment is necessary to ensure the required level of effectiveness.

**Environmental exposure controls**

Avoid release in the environment. Use the surplus or dispose it of properly.

## SECTION 9: Physical and chemical properties

**Information on basic physical and chemical properties****General Information****Physical state**

Fluid

**Appearance:****Form:**

Fluid

**Colour:**

Whitish

**Odour:**

Mild

**Odour threshold:**

Not safety relevant

**pH at 20 °C (68 °F)**

6 - 8

**Change in condition****Melting point/freezing point:**

~ 0 °C (~ 32 °F) (ISO 3016)

**Boiling point or initial boiling point and boiling range**

100 °C (212 °F)

**Flammability**

Product is not flammable.

**Flash point:**

Not applicable

**Decomposition temperature:**

Not determined

**Oxidising properties:**

None

(Contd. on page 7)

**AQUA DUO 822 - Liquid component**

(Contd. of page 6)

<b>Explosive properties:</b>	Product does not present an explosion hazard.
<b>Ignition temperature:</b>	Product is not selfigniting.

**SECTION 10: Stability and reactivity**

**Reactivity**

No dangerous reactions known.

**Chemical stability:**

The product is stable as long as it is stored properly and dry.

**Thermal decomposition / conditions to be avoided:**

No decomposition if used according to specifications.

**Possibility of hazardous reactions**

No dangerous reactions known.

**Conditions to avoid**

No further relevant information available.

(Contd. on page 8)

**AQUA DUO 822 - Liquid component**

(Contd. of page 7)

**Incompatible materials**

No further relevant information available.

**Hazardous decomposition products**

No dangerous decomposition products known.

**Minimum storage life:**

Minimum storage life (+5°C up to 25°C): See indication on package.

**Additional information:**

No further relevant information available.

## SECTION 11: Toxicological information

**Information on hazard classes as defined in Regulation (EC) No 1272/2008**

The product was not investigated. The statement is derived from the properties of the single components.

**Acute toxicity:**

Based on available data, the classification criteria are not met.

**LD/LC50 values relevant for classification:****2682-20-4 2-Methyl-2H-isothiazol-3-one**

Oral	LD <sub>50</sub>	232 - 249 mg/kg (Rat) (OECD 401)
Dermal	LD <sub>50</sub>	242 mg/kg (Rat) (OECD 402)
Inhalative	LC <sub>50</sub> (4h)	0.05 mg/l (ATE)
	LC <sub>50</sub> (4h)	0.11 mg/l (Rat) (OECD 403)

**Other information (about experimental toxicology):****2682-20-4 2-Methyl-2H-isothiazol-3-one**

Oral	OECD 408 (Repeated dose oral toxicity 90d)	19 mg/kg bw/day (Rat)
Irritation of skin	OECD 404 (skin)	(Rabbit) corrosive
Sensitisation	OECD 406 (sensitization)	(Guinea pig) sensitizing

**Primary irritant effect:****On the skin:**

Based on available data, the classification criteria are not met.

**On the eye:**

Based on available data, the classification criteria are not met.

**Sensitization:**

Sensitising effect by skin contact is possible by prolonged exposure.

Based on available data, the classification criteria are not met.

**Germ cell mutagenicity:**

Based on available data, the classification criteria are not met.

**Carcinogenicity:**

Based on available data, the classification criteria are not met.

**Reproductive toxicity:**

Based on available data, the classification criteria are not met.

**Specific target organ toxicity - single exposure (STOT SE):**

Based on available data, the classification criteria are not met.

(Contd. on page 9)

**AQUA DUO 822 - Liquid component**

(Contd. of page 8)

**Specific target organ toxicity - repeated exposure (STOT RE):**

Based on available data, the classification criteria are not met.

**Aspiration hazard:**

Based on available data, the classification criteria are not met.

**Practical experience**

No further relevant information available.

**General comments**

No further relevant information available.

**Information on other hazards**

**Endocrine disrupting properties**

None of the ingredients is listed.

**SECTION 12: Ecological information**

**Toxicity**

The product was not investigated. The statement is derived from the properties of the single components.

**Aquatic toxicity:**

**2682-20-4 2-Methyl-2H-isothiazol-3-one**

LC <sub>50</sub> (96h Marine water)	2.98 mg/l (Water flea - daphnia magna)
LC <sub>50</sub> (96h Freshwater)	0.934 mg/l (Water flea - daphnia magna)
LC <sub>50</sub>	4.77 mg/l (Fish) (OECD 203)
EC <sub>10</sub>	0.044 mg/l (Water flea - daphnia magna) (OECD 211)
	4.93 mg/l (Fish)
EC <sub>50</sub>	41 mg/l (Activated sewage sludge) (OECD 209)
	0.103 mg/l (Algae - pseudokirchneriella subcapitata) (OECD 201)
EC <sub>50</sub> (16h)	2.3 mg/l (Pseudomonas putida)

**Persistence and degradability**

A part of the components is biodegradable.

**Bioaccumulative potential**

No further relevant information available.

**Mobility in soil**

No further relevant information available.

**Results of PBT and vPvB assessment**

**PBT:**

This substance/mixture contains no components classified as persistent, bioaccumulative and toxic (PBT) at levels of 0.1% or higher.

**vPvB:**

This substance/mixture contains no components classified as very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

**Endocrine disrupting properties**

This substance/mixture does not contain components with endocrine disrupting properties according to the criteria of Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 in concentrations of 0.1% or higher.

**Other adverse effects**

No further relevant information available.

(Contd. on page 10)

### AQUA DUO 822 - Liquid component

(Contd. of page 9)

**Literature**

No further relevant information available.

**Ecotoxicological effects:**

No further relevant information available.

**Behaviour in sewage processing plants:****2682-20-4 2-Methyl-2H-isothiazol-3-one**EC<sub>20</sub> (3h) 2.8 mg/l (Activated sludge organisms) (DIN 38412-3 TTC-Test)**Additional ecological information:****General notes:**

Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

## SECTION 13: Disposal considerations

**Waste treatment methods****Recommendation:**

Must not be disposed together with household garbage. Do not allow product to reach sewage system.

Dispose of contents/container in accordance with local/regional/national/international regulations.

**European waste catalogue**

17 09 04	Mixed construction and demolition wastes other than those mentioned in 17 09 01, 17 09 02 and 17 09 03
15 01 02	Plastic packaging

17 09 04 for the setted product

15 01 02 for the completely emptied packaging

**Uncleaned packaging****Recommendation:**

Disposal must be made according to official regulations.

Recycle only completely emptied packaging.

**Recommended cleansing agents:**

Water, if necessary together with cleansing agents.

## SECTION 14: Transport information

**UN number or ID number**

ADR, ADN, IMDG, IATA

Void

**UN proper shipping name**

ADR, ADN, IMDG, IATA

Void

**Hazard statements** Void

**Directive (EU) 2012/18**

**Named dangerous substances - ANNEX I :**

None of the ingredients is listed.

**Biozide ingredients (EU) 528/2012:**

Data based on recipe and information on the raw materials from the supply chain.

Tetramethylolacetylene diurea	< 0.03%
2-Methyl-2H-isothiazol-3-one	< 0.0015%

**Classification according (EU) 2004/42:**

Not applicable

**Other regulations, limitations and prohibitive regulations:**

·Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (UK REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC

(Contd. on page 12)

### **AQUA DUO 822 - Liquid component**

(Contd. of page 11)

·Commission Regulation (EU) No 878/2020 of 18 June 2020 amending Annex II to Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (UK REACH)

·Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006

·Regulation (EC) No 1013/2006 of the European Parliament and of the Council of 14 June 2006 on shipments of waste

·Regulation (EC) No 528/2012 of the European Parliament and of the Council of 22 May 2012 concerning the making available on the market and use of biocidal products

#### **Chemical safety assessment**

A Chemical Safety Assessment has not been carried out.

## **SECTION 16: Other information**

#### **Reasons for changes:**

\* Data compared to the previous version altered.

#### **Relevant phrases:**

H301 Toxic if swallowed.  
H311 Toxic in contact with skin.  
H314 Causes severe skin burns and eye damage.  
H317 May cause an allergic skin reaction.  
H330 Fatal if inhaled.  
H400 Very toxic to aquatic life.

#### **Advice for instructions:**

Additional trainings, which go beyond the prescribed training in activities involving hazardous substances are not required.

#### **Literature and the data sources:**

#### **Department issuing MSDS:**

Product safety department (+43/(0)5522-41646-0 / klaus.ritter@fixit-gruppe.com)

#### **Contact:**

Dr. Klaus Ritter

#### **Abbreviations and acronyms:**

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail)  
ICAO: International Civil Aviation Organisation  
MAK: Maximale Arbeitsplatz-Konzentration (maximum concentration of a chemical substance in the workplace, Austria/Germany)  
PBT: persistent, bioaccumulative and toxic properties  
vPvB: very persistent, bioaccumulative properties  
ADR: Accord relatif au transport international des marchandises dangereuses par route (European Agreement Concerning the International Carriage of Dangerous Goods by Road)  
IMDG: International Maritime Code for Dangerous Goods  
IATA: International Air Transport Association  
EINECS: European Inventory of Existing Commercial Chemical Substances  
ELINCS: European List of Notified Chemical Substances  
CAS: Chemical Abstracts Service (division of the American Chemical Society)  
VOC: Volatile Organic Compounds (USA, EU)  
DNEL: Derived No-Effect Level (UK REACH)  
PNEC: Predicted No-Effect Concentration (UK REACH)  
LC50: Lethal concentration, 50 percent  
LD50: Lethal dose, 50 percent  
PBT: Persistent, Bioaccumulative and Toxic  
vPvB: very Persistent and very Bioaccumulative  
ATE: Acute toxicity estimate values

(Contd. on page 13)

**Safety data sheet**  
according to UK REACH**KREISEL®**

Printing date 09.12.2024

Version number: RO/ 35 (replaces version 34)

Revision: 03.10.2024

**AQUA DUO 822 - Liquid component**

(Contd. of page 12)

Acute Tox. 3: Acute toxicity – Category 3

Acute Tox. 2: Acute toxicity – Category 2

Skin Corr. 1B: Skin corrosion/irritation – Category 1B

Skin Sens. 1A: Skin sensitisation – Category 1A

Aquatic Acute 1: Hazardous to the aquatic environment - acute aquatic hazard – Category 1

**Further information:**

The information in this safety data sheet describe the safety requirements of our product and is based on our current state of our knowledge. They provide no assurance of product quality. Existing laws, ordinances and regulations, including those that are not mentioned in this data sheet must be observed by the recipient of our products in their own responsibility.
