## HASIT PP 201 SILICA LF

(Contd. of page 5)

# Hand protection:

Hand protection: Chemical resistant protective gloves according EN ISO 374

The glove material has to be impermeable and resistant to the product. Due to missing tests no recommendation to the glove material can be given for the product. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation. Check protective gloves prior to each use for their proper condition. Preventive skin protection by use of skin-protecting agents is recommended. To avoid skin problems reduce the wearing of gloves to the required minimum.

# Material of gloves:

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

## Penetration time of glove material:

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

# For the permanent contact gloves made of the following materials are suitable:

Polychloroprene (material thickness  $\geq 0.5$  mm; breakthrough time  $\geq 480$  min.) Nitrile rubber (material thickness  $\geq 0.35$  mm; breakthrough time  $\geq 480$  min.) Butyl rubber (material thickness  $\geq 0.5$  mm; breakthrough time  $\geq 480$  min.) Fluororubber (material thickness  $\geq 0.4$  mm; breakthrough time  $\geq 480$  min.) Neoprene (material thickness  $\geq 0.5$  mm; breakthrough time  $\geq 480$  min.)

# Not suitable are gloves made of the following materials:

Non-liquid-tight gloves made of fabric, leather or similar materials.

## Eye/face protection:

In case of splash risk use tightly fitting safety goggles according to EN 166.

# **Body protection:**

Protective work clothing

## Risk management measures:

An operator training/guidance in the correct use of personal protective equipment is necessary to ensure the required level of effectiveness.

### **Environmental exposure controls**

Avoid release in the environment. Use the surplus or dispose it of properly.
